

# SPECIALTY TAPES

MORE EFFICIENT,  
MORE PROFITABLE

Whether you're screen printing, decorating garments or painting a sign, RTape has a specialty tape to make your job faster, easier, and trouble free.

## **Block Out** Film Tape

Blue Block Out™ tape is a self wound polyethylene film tape coated with an aggressive adhesive. Its water based adhesive resists attacks by inks and solvents, and withstands multiple pressure washes and solvent baths. Blue Block Out™ is easy to apply and removes cleanly from frames and mesh with no adhesive residue.

## **Pallet Protek** Paper Tape

Pallet Protek™ is a standard weight saturated smooth paper tape with heat resistant adhesive. Cleaning up messy spray adhesive from your pallet is time consuming and costly. It's also unnecessary. By covering your pallet with Pallet Protek™ and spraying the paper tape instead of the pallet, press clean up time is simply a matter of removing and discarding the tape. The whole process is fast and easy.

## **Hot Mask** Transfer Tape

HotMask® series of self-wound polyester transfer tapes are designed to protect printed heat transfer material from the high temperatures of heat pressing. Available in different tack levels, HotMask® transfers print and cut graphics from the carrier film and aids alignment of the graphic. HotMask® is compatible with all brands and types of printable heat activated media.

### Applications

#### BLOCK OUT TAPES

Screen Printing  
Wooden Frames  
Aluminum, Retensionable Frames

#### PALLET PROTEK

Textile Screen Printing

#### HOTMASK

Printed Flock Films  
Polyurethane Films  
Vinyl Films
